1. **We do not** provide mental health treatment services at this location. Do we still need to complete the questionnaire? Yes, we still need to hear from you so we can update our records. However, the number of questions you will be asked is minimal.

2. **This facility is privately owned.** We don’t get any Federal, State, or local funds. Should we participate in the survey? Yes, it is very important to have information about all mental health treatment providers so that we can properly describe our national mental health treatment network, including service availability.

3. **Is it mandatory that I complete this survey?** Your participation is very important. Because the N-MHSS is the most comprehensive source of data on mental health treatment facilities in the nation, policymakers at local, State, and Federal levels use information from the N-MHSS to determine the extent of services available and what new or expanded services may be needed. Facilities that respond to the survey are listed in SAMHSA’s online Behavioral Health Treatment Services Locator, which can be found at: https://findtreatment.samhsa.gov.

4. **How was this facility selected?** The goal of the N-MHSS is to contact all eligible facilities in the nation and U.S. territories that provide mental health treatment services as their primary focus. Some of the facility contact information comes from the previous N-MHSS conducted in 2018. Additional contact information may have been provided by state agencies and national professional associations.

5. **My facility’s information is the same as last year; why can’t you use that information?** Here is some good news! If you completed the 2018 N-MHSS, your responses to questions that typically do not change from year to year will be prefilled in the online questionnaire. All you need to do for these questions is check them, correct if necessary, and click the Submit button. Enclosed in the packet you received in the mail is a green flyer that provides the Internet address and your facility’s unique user ID and password, which are required to access your facility’s questionnaire on the Internet.

6. **We would like to participate, but we do not want our facility to be listed on SAMHSA’s online Behavioral Health Treatment Services Locator.** Is this possible? Yes, you can still participate in the survey. Near the end of the survey questionnaire, there is a question that asks whether or not you want the facility listed on the Locator.

7. **My organization has multiple facilities that participate in the N-MHSS, can I complete multiple web surveys at once?** Yes! If you are responsible for completing the N-MHSS for more than one location, you can now complete multiple web surveys at the same time.

8. **Will I be able to go back and change answers?** Yes, you will see a button to update your answers and have the ability to jump back and update previously-answered questions, even if you have left the session and logged off. You will be able to go back in and make corrections until you click on the final submit button and receive your confirmation number.

9. **Our facility offers telemedicine/telehealth to clients; how should this be reported and what modes of service does this include?** Telemedicine/telehealth programs are growing approaches to mental health treatment involving electronic communication between facility and client. This “remote” technological approach includes the use of email, Internet, Web, mobile, interactive video, patient portals and desktop programs. Although you may not consider telemedicine/telehealth to be regular outpatient treatment, please count it as such for the purpose of the survey.

10. **Where can I find more information about terms used in the N-MHSS?** Definitions for some of the terms used in the N-MHSS can be found at https://info.nmhss.org. You can also call the N-MHSS helpline at 1-866-778-9752.

11. **How do I achieve the best online experience?** Although all browsers are supported, Chrome, Firefox, and Safari offer the best experience completing the online survey. When using a mobile device, it is recommended that you view the screen horizontally (landscape orientation).
